

KIT 04 COMPLETE

IT'S round plastic box with brass mixer (hot and cold water), flexible long 160cm and shower-head with lever On / Off / Continuous flow control.

The INSTALLATION is very easy: is necessary only a round hole of 10cm diameter and 4 screws (not included). Attention, is necessary 25cm behind the wall and near 50cm for to leave fall the flexible.

The kit have 2 different cap: one with key and one with-out. The first is interesting for give greater

importance to security, the second for have greater velocity to use.

ASK TO major distributors "KIT 04 COMPLETE" if you have cold and hot water.

FOR USE IT: open the cap, extract the shower, lift the lever of the mixer and select the temperature, push or lift the lever of the shower-head. Cleaning yourself. At end closed the mixer and the shower.
