

Fuel Sender	S5-A	S5-E	
	art.no: 323130 to 323150	art.no: 323100 to 323126	Revision: 2006-9-19

Description:

The S5-fuel sender is made from AISI 316 stainless steel. The sender gives several equal steps to the gauge (depending on the sensor length). S5 has standard SAE 5 hole pattern for mounting.

The S5-A-sender can replace other fuel senders with resistance 240-30 ohm.

The S5-E-sender can replace other fuel senders with resistance 0-180 ohm.

Troubleshooting:

To test correct operation, unscrew fuel sender, connect two wires to multimeter, set to resistance and move float up and down by hand.

S5-A-sensor

With float at the bottom it should read 240 ohm and at the top 30 ohm.

S5-E-sensor

With float at the bottom it should read 0 ohm and at the top 180 ohm.
