

Technology:

Our product development processes are based on a close study of natural phenomena. Just as water droplets take the dirt with them in rolling off a lotus leaf, the Lotus Hybrid Matrix in Feldten Marine sealants and impregnations creates an easy to clean surface.

We are presenting a new generation of surface protection products. Research and development being conducted in our proprietary and certified nanotech labs is enabling us to leverage chemical nano technologies that will be extremely useful and create sustainable value for product users.

We are unwaveringly committed to developing solutions that are user-friendly and absolutely safe. The salient feature of Feldten Marine solutions relative to classic products is optimum effectiveness and durability. The materials are very easy to apply why you achieve much easier maintenance and optimal protection during the whole sailing season.

About us:

For the past 125 years, Feldten has provided innovative protective solutions for materials and to safeguard against weather and wear. With Feldten Marine we are entering a new area where our traditional brand is powered up by innovative nano technology and one can truly feel the difference.

Having long-term experience and expertise in boat care products we are using cutting-edge technology and know-how to serve with best products for distributors and customers worldwide.

GELCOAT SEALER UV+

CLEANING, POLISHING
AND SEALING ALL-IN-ONE

Multifunctional and time-saving product with Easy2Clean properties for treatment of all Gelcoat surfaces above the waterline. UV damaged and faded gelcoat surface regains its original color- fast and easy. No precleaning necessary. Extremely UV-resistant. Time-saving up to 50% compared with traditional wax products.

After the treatment it is substantially easier to clean; for example soot particles from the exhaust and dirt residue on the waterline. Repeated treatments extend the effect.

Available in 250 ml and 1000 ml aluminium bottle

METAL SEALER

NEW PRODUCT!
AVAILABLE NOW!

CLEANING, POLISHING
AND SEALING ALL-IN-ONE

Cutting edge nano technological protection of metallic surfaces (aluminium, stainless steel, copper, etc) above the waterline that effectively cleans and seals all in one working process.

Available in 250 ml aluminium bottle

PROPELLER & DRIVE SEALER

NEW PRODUCT!
AVAILABLE NOW!

EASY SPRAY APPLICATION, REDUCES ADHESION OF BIO GROWTH, STUNNING EASY-TO-CLEAN PROPERTIES

Durable transparent and ultrathin protection for propeller, drive and other metallic surfaces under the waterline that effectively reduces adhesion of biological growth in sweet and salt water. Offers stunning easy-to-clean properties.

Available in 125 ml spray can, aerosol
