External Audio Output

Waterproof Deck Connector

USB Upgradeable

BENEFITS

Bluetooth® Wireless Technology in a unique noise-canceling handset design.

Cobra exclusive noise muting technology for crystal clear communication. Loud and clear incoming audio. Phone calls are heard through the unit's powerful speaker.

Install and setup in as little as 30 minutes.

Meets JIS7 Standards; submersible for 30 minutes in one meter deep water.

Large dot matrix display area allows for clarity and ease of view and use.

No need to recharge or replace batteries.

Cobra has been making microphones for 40+ years. We know what works!

Easy one-time configuration. Simply use your **Bluetooth®** capable mobile phones menu to pair it with the MR F300 BT EU, the same way you would a **Bluetooth®** headset.

The number and name (if in contact list) of incoming calls appears on the LCD screen for easy caller identification.

One-touch redial of last phone number dialed.

Press one key to see the Call Log of incoming, outgoing and missed calls. Easily call any number on the list.

Your 50 favorite people. Easy to program and easier to dial. Makes it easy for you to access your most frequently used numbers.

Volume can be set or controlled during the call with ease.

Choose from 10 of Cobra's predefined ring tones.

This software controlled option (with a dedicated button) allows you to use this device in a speakerphone hands-free mode. For normal operation, you press the PTT button while you talk, eliminating all of your background noise.

Great visibility during day or night. Easy to operate with a cool blue display. Low backlighting settings for low-light bridge conditions.

Pairs with up to 8 different mobile phones. One used at a time. Easy to switch between paired phones.

Allows a method for you to connect the MR F300 BT EU to your stereo's Aux Input. The voice of your caller (To Marine Stereo) can be played through your stereo over your boat's amplified speaker system.

This device connects directly to your boat's 12V DC power system through an easy to install waterproof plug.

Cobra software upgrades and enhancements can be made through a standard USB Connector.

THIS IS NOT A VHF RADIO

Cobra does not endorse mobile telephones as substitutes for marine radios. They generally cannot communicate with rescue vessels and, if you make a distress call on a mobile telephone, only the party you call will be able to hear you. Additionally, mobile telephones may have limited coverage over water. If you do not know where you are, the Coast Guard will have difficulty finding you if you are using a mobile telephone.

However, mobile telephones can have a place onboard where coverage is available - to allow social conversations and keep the marine frequencies uncluttered and available for their intended use.
