

Sirius 500

STATE OF THE ART POLYESTER ROPES THAT SET THE BENCHMARK

For many years Sirius has been the benchmark in PES rope, oftentimes copied-but never matched. High breaking loads and low stretch are achieved by using the absolute best materials. With its wide range of applications, it's no wonder Sirius 500 is highly acclaimed by sailors everywhere.

CONSTRUCTION

An extremely abrasion-resistant 32-plait PES twill weave sheathing covers a strong, 12-plait PES core. Both covering and core help carry loads. We recommend the application of a High End splice for the Sirius 500, to achieve optimised strength.
