ThermoConnect TCon2

Anywhere. Anytime. Smart way to control your parking heater.

ThermoConnect TCon2 Receiver

Compact housing: Easy to integrate in tight spaces

Reduced installation times: Simple Plug&Play principle with just only one plug connector.

Integrated antennas: No need for time consuming fitting of antennas, as both cellular and GPS antennas are already equipped in the TCon2 receiver.

Ready to use out of the box: eSIM is pre-installed and activated, thus no additional SIM card handling is needed, such as installation or refill of prepaid credit.

No roaming restrictions: eSIM connects automatically with a local mobile provider over 2G/4G and transmits signals over data connection.

Fits to every heater: TCon2 is easily programmable and adaptable to any kind of Webasto heater type, air or water.

Perfect choice for upgrades: Webasto remote controls of previous generations are easily retrofittable with the new TCon2 unit. Even factory-preinstalled Webasto heaters can be updated with new connectivity features.

- **Compact housing with integrated antennas**
- **Reduced installation times**
- **Ready to use out of the box**
- **eSIM preinstalled and activated**
- **Signal transmission through data connection 2G / 4G**
- **Fits to every heater type**
- **Perfect choice for upgrades**
