Precision™

Communicate • Collaborate • Innovate • Drive Growth

Program Overview - Description

- Marinco's new, innovative spot light program addresses the common problems found in competitive spot lights by making the most versatile, most durable, most consistent and most easy to use spotlights on the market.
- With a unique, totally enclosed housing design all the critical components are fully protected, for long lasting operation.
- Smart, wireless communication between the remotes and the lights allow for versatility in where the controls and lights can be placed.
- Universal 12 or 24 volt operation in a single design
- Bright 100 Watt H3 Halogen bulb and optimized reflector and lens provide a bright and consistent light pattern.
